- Chapter 5  Setting a realistic budget that you can afford to try and win the lottery
- Chapter 6  Following 1 reliable lottery system or software at a time that will aid you
- Chapter 7  Believing you will win. Visualization is everything
- Chapter 8  Seeking help of a psychic to guide you, finding a good one that has helped other lottery winners
Introduction

Supposedly, a person will only have happy, positive thoughts if he won the lottery. He will start making plans and he will do a lot of budgeting. Suffice to say, positivity is the aftermath of winning the lottery. However, there are a lot of people who tend to associate negative thoughts with winning the lottery. They’re afraid of the unknown, and this is what causes their anxiety.

The most efficient way in order to suppress these negative thoughts is by ascertaining where these come from. Once the person has determined where these destructive thoughts originate, he should cease the pattern and this can be done by employing positive thinking, having positive affirmations, and by doing positive actions.

Whenever people find a coin along the street, no matter what the value is, they should make it a habit to give thanks to the Universe for providing a positive sign that abundance is continuously streaming into their lives. People should also do the same in case they lose money, since this serves as a valuable lesson. Henceforth, people should consider every event or happening as a relevant sign that they’re destined to have a prosperous life.
Chapter 1
Mentally Preparing Yourself To Win The Lottery

Frequent Practice may yield positive results

People can do this by playing Bingo frequently and by visualizing themselves that they’re winning. There are experts who say that if people think that they can make it, they become more determined to reach their goal. As a matter of fact, there are even those individuals who believe that if they’re full of positivity, it will be easier for them to win Bingo or any contest that they join.

Some people don’t believe in the power of this habit, but for many, this attitude can help them reap a lot of benefits. Lottery enthusiasts can start by getting used to winning small contests. Through this way, they can have a mindset that winning big stuffs are easier and that winning the lottery is more achievable.

But people want to win the lottery immediately...

It’s understandable that lottery enthusiasts want to reap results right away. However, this is a wrong mindset, a wrong goal. Many lottery enthusiasts highly agree that it’s quite difficult to avoid this kind of mindset.

There are questions that are associated with this mindset: are lottery enthusiasts determined to work on this ultimate goal daily? Or are they willing to wait until they attain their big dream?
Check out this story...

In 1983, when he was still a struggling comedian, Jim Carrey made himself a cheque that is worth 10 million dollars. This check became Jim Carrey’s motivation, and by 1996, he received 20 million dollars for his performance in The Cable Guy. Are lottery enthusiasts willing to do what Jim Carey did? Are they willing to wait for a long span of time, without losing grip of their dream that they’ll become a lottery winner in the future? Several people would certainly give up and stop believing.

Below are some positive actions that people, particularly lottery enthusiasts, can do in order to justify to the Universe that they’re determined to achieve a prosperous living.

- They can purchase lotto tickets on a regular basis; however, they should do it without desperation. They should not be too clingy with the result, but they must exert effort to reach their goal.
Lottery enthusiasts should put in their goal list that they'll be rich in the future. In order for them to be very motivated, they can add the amount that they want to earn.

Adding pictures on their dream or goal board is a sound and motivating idea. Lottery enthusiasts can add a huge photo of a cheque, a bag of money, or pictures of the things that they want to buy if they won the lottery.

They should also revamp their money habits and justify that they’re capable of taking care of every blessing that they currently have. For instance, they should be able to cover their taxes in a timely manner instead of avoiding it or paying it on a later time. They should also learn how to take care of their debts by paying it on the designated due date, and they should as well track down where their earned money goes.

People should be grateful with the kind of life they have at present. For instance, they should treat their present car the same way how they treat a luxury car.

They could as well make their ultimate income goal as their password so that could type it in in regular basis, serving as a reminder that they have a dream to attain.

Place the word “Millionaire” after the name of their partner's name, because this can give positive energy.

Last but not least, lottery enthusiasts should always visualize themselves as rich. They should imagine all the perks that being a lottery winner can give; they should visualize all the nice things that they can do if they won the lottery.

If lottery enthusiasts follow these simple yet useful tips and tricks, they’ll realize that “good luck” begins to actuate in their lives. Typically, it starts by winning small stuffs like winning free concert tickets or tickets for a movie. They should track down these small yet amazing wins and they should be thankful for their good fortune.

However, lottery enthusiasts should not put their lives on hold until they reach their goal. They should exert effort to achieve success in other aspects- they should forward book proposals, request for a salary increase, book a beautiful holiday escapade, and love their lifetime partner, girlfriend or boyfriend.
Lottery enthusiasts should remember that money can only enhance who they already are. They should be able to show to the Universe they are happy and grateful people, regardless of the good fortune that will come to their life.
There are a lot of people who have won the lottery because they have followed the tips on boosting the power of the mind. It will certainly do you good to follow their advice.

**Love and luck**

**How to be Successful in Lottery through the Power of the Mind**

What if a person wants to begin playing the lottery but doesn’t know how to actually start?

There are a lot of individuals who are wondering if there is a secret way that can be done in order to win the lottery. Their wait is now over, since the path towards success in lottery is shown below. Through the given tips, one can play the lottery efficiently and eventually become a winner.
Majority of the people agree that lottery is a game that involves statistics and numbers. However, only few people think that they are capable of learning the Mathematics of lottery. The primary secret is that this game has rules that can be easily understood.

Everyone is capable of learning how to take control of the game, using the head and not the emotions. Everyone can also learn how to live prosperously once they’ve learned how to snag success in the field of lottery.

Lottery enthusiasts can do it, even though they’re thinking that they can’t by using new, helpful, and affordable schemes that can justify that achieving a lottery win is not impossible. Among the things that lottery enthusiasts can learn are:

- Real facts that feature the positive sides not only of gambling, but also of lottery.

- The boxes and straight-bets and how these aspects can affect the strategy that is best for the players.

- How positive thoughts help them attain success in the field of lottery and how to employ these thoughts in the most efficient way.

- How to utilize the power of the subconscious mind to lure the win (including similar sets of strategies that enabled a certain couple to win the lottery for two times!)

- How powerful visualization is and how it can jump-start a person’s success after winning the lottery.

- The ways to re-program the subconscious mind in order to break the hindrances that causes lottery enthusiasts to think and believe that winning is impossible.

Among the components in the package are 4 audio recordings that tell all the things that lottery enthusiasts should know in order to win. People will also have a self-hypnosis guide, which is in mP3 form that can take them from beginner to advanced expert in Lottery.

The movie entitled as The Secret aims to tell people that the human body possesses a certain vibration frequency that can attract things. As an individual becomes spiritually enlightened and as he becomes aware of how his thoughts impact the reality (or his thoughts become his reality), he moves towards becoming the so-called conscious co-
creator. Being a conscious co-creator, the person works with the unlimited abundance and with the Universe’s wisdom to enhance his financial state.
Chapter 4
Learning As Much As Possible From All The Information Out There (Blogs, Systems, Websites, Softwares, Etc.)

It’s a good thing that there are numerous resources that you can use to learn more about the power of the mind.

Assertions that can help Lottery Enthusiasts in Crafting a Winning System

The fact that this program has something to do with the usage of Metaphysics to enhance one’s financial abundance, included are some assertions that can help lottery enthusiasts achieve prosperity and wealth:

- The wealth is continuously flowing
- The Universe works for them
- Lottery win is just an inch away from their reach
- Lottery enthusiasts can craft an efficient winning lottery system
• The details in the program are very easy to use

• Lottery enthusiasts can easily comprehend the math and science of the lotteries

• Lottery enthusiasts apply their knowledge in lotteries

• They believe that they can win the lottery

• They are abundant in many ways

The Pendel Method

Can people win the lottery by using their intuition or by unveiling the secrets of the subconscious mind?

There are a lot of people who think that there is a formula to win the lottery, and they truly believe that they have to crack the code to achieve their desired result. However, there are experts who believe that these formulas are not worthy to be trusted. These experts highly believe that with the aid of the intuition or the subconscious mind, one can enhance his chances of winning the lottery.

Majority of people are aware of this premonition on the so-called metaphysical level, which came from their past experiences in different aspects of life. It was published in a certain newspaper that there was a lottery player, 19 years of age, who won a million worth of lottery jackpot. 2 years prior to his win, his elder sister received about €1 million from lottery.

4 years prior to his winning moment, his father was the first winner of the lottery series, whereby he received €0.6 million. What makes the story very interesting is the fact that the said family members won whenever the 19 years old lottery winner’s older sister was pregnant or about to give birth. The questions are: Did these coincidences happen every 2 years? Or were there forces that were involved?

In fact, there were documented equally strange cases of winners of lotteries. On top of these facts, these lottery winners mostly utilized a single combination row.

The Perks of the Pendulum Method

• Lottery players can ascertain the lottery numbers of the given drawings:

  • Powerball- USA
• OZ Lotto- Australia- 7 out of 45
• MegaMillions- USA

• Lottery players can play with minimal financial risk because all they need is a combination row for every category. With the aid of the subconscious mind, one can have a high chance of snagging success in the lottery world and that this combination row would suffice.

• Lottery players will have a step by step tutorial of this excellent Pendulum Method.

• The eBook is comprised of pendulum boards.

**Unveiling the Mystery that Evades the Subconscious Mind**

The subconscious mind connects people to the inner world or the so-called metaphysical level. Through the subconscious mind, the people are attached with the universal spirit and with the Universe’s infinite constructive power. The ultimate secret of life is to correlate the 2 centers- the Metaphysical level and the physical level, and to comprehend their functions.

Through this way, people can consciously make their subjective and objective mind work together, thus, coordinating the infinite and finite. The Pendulum Method offers a small door towards this magnificent knowledge. The people’s future is in their own hands. It’s not in the hands of unstable and arbitrary external power.

**The Beauty of the Pendulum Method**

Despite the fact that the Pendulum method doesn’t guarantee accurate numbers, by practicing using this methodology and through enhanced sensitivity, the predictive powers will take effect. This can render lottery enthusiasts efficient help in attaining wealth and prosperity.

The beginning of the so-called “Swinging point” has always been the point of concern. The Pendulum Method may rotate to the right or to the left. It can as well be a line swinging back and forth. The movement signifies the response which is defined individually.

When using the Pendulum method, one should know that the pendulum must swing adjacent to a line, on a back and forth motion. Swinging the Pendulum is considered as
an old strategy. As a matter of fact, this practice can be traced back centuries ago. As time passes by, this practice has expanded, thanks to the modern researches.

The Pendulum is not only used in the field of Lottery, in fact, it is also being used as a primary instrument in other fields, like Archeology, Physics, Geology, agriculture, Character Customer, Psychology, Forestry and Meteorology.
Chapter 5
Setting A Realistic Budget That You Can Afford To Try And Win The Lottery

You don’t have to spend a huge amount of money in winning the lottery. You just have to spend a limited amount of your budget.

How to Win the Lottery

The most important thing that you should do is to concentrate on this amazing idea. You have to think about it night and day. Condition your mind that you’ll win. Make sure to open your thoughts to prosperity so you’ll easily win the coveted lottery.

Another important thing that you should remember is to use the power of affirmation. Make it a point to read several articles about winning the lottery. Do this on a daily basis. Then, think about what you should do with the money that you’re going to have. Will you be traveling abroad? Purchase a new home for you and your family? Get a new car? Invest in real estate?

Discovering the Secrets of Winning the Lottery

Prosperity is definitely open to any person who is willing to take it. You have to convince your brain that getting all that money is just as easy as 1-2-3 and you can even hit the jackpot on your first try. You have to internalize everything about winning the lottery. Anything positive will do. Just make sure that you avoid all sorts of negative thinking.
You can obtain your source of information from anywhere. No matter what your source is, the most significant thing is for you to obtain a conviction. You have to understand the principles or rules of mental programming because this will allow you to win the lottery.

Professional athletes will tell you that winning is not merely accidental. This would require more than simply planning ahead and having enough knowledge. It’s crucial that you get yourself into the perfect mental state in order to win. Every time you are on the field, you cannot simply think about anything else. You have to focus on your goal. Here’s how:

1. Visualize the coming moments. There are certain situations in every career or profession, and when you think that you should absolutely be in the center of it, it’s important that you remain on top of the playing field – that is, if winning is your top priority. As you start looking through your calendar each morning, you have to properly identify those moments. Make it a point to devote a minute or two prior to each moment so you can have sufficient time to win.

2. Make sure to adopt the winner’s physiology. The body and mind are considered to be in a feedback loop. Hence, if you are frowning, slumping, taking shallow breaths and cramped, the body is simply telling your brain to fail. Do you know that you can actually break this type of downward spiral, and this can be done when you act like a real winner. You should do the following:
   - Smile
   - Hold your head high
   - Stretch
   - Shake your body out
   - Take 3 long and deep breaths

After doing these things, your body will now be telling your brain to win.

3. You have to visualize winning the lottery. This is the perfect time for you to come up with a vivid image that will be retained in your mind. Think of your reaction the moment you’ve learned that you won the lottery. Will you be jumping with joy? Think of how things will turn out to be once you have won millions of dollars. Can you imagine the sounds and words that you would be hearing?

Think of how your friends and relatives will be saying congratulations. Can you hear their applause? The most important thing of all is for you to imagine how you will feel
the moment you learn that you’ve won a huge amount of money. You have to your victory so real. Feel like you have already won!

4. You have to mentally rehearse the things that you will do and say after winning the lottery. Tracing from what you have just laid out in your mind, you have to specify the actions that you can take so as to win in a particular situation. You have to play it out vividly in your mind. Include any type of obstacles or hindrances which might come up in the process.

5. Disconnect yourself from the goals and outcomes. Now that you have conditioned both your mind and body that you have already won the lottery, and how you can actually win, the next thing that you should do is to let go of everything. Think as if everything is already part of history. Do not think about losing or winning. Simply focus on the things that you want to do. If you are watching the Olympics, you can actually see how the athletes savor the moment before they actually begin. This is where they shrug off any thought of winning. They simply make themselves prepared and ready to take the plunge.

6. Get into the action. Go. Place your bet.

7. Celebrate. Regardless of the outcome of your actions, and even before you realize whether you have won or not, you have to celebrate.

8. Learn. There are various resources that you can utilize for this particular purpose. Read several online articles that will show you how to win the lottery. Those who have previously won made it a point to release posts, blogs, articles and ebooks on how they were able to win the lottery. Learn how to come up with the right strategy. Hone your line of thinking in order to make the entire process more powerful. This is how you can prepare for the next big thing.

It is recommended that you try these methods or procedures for at least 3 days. Who knows? It might eventually change your life.

**What is Intuition then?**

As a matter of fact, no one knows what really Intuition is, though there are studies going on in order to determine the answer. One thing that many people believe is that Premonition and Intuition truly exist and there are a lot of cases that justify that they can yield accurate results. The subconscious thoughts of the people are considered as little electrical impulses that fire up in the brain’s neurons.
Just like the Light, the electrical impulses are also energies. The question is more focused on the quickness of the thought. Conscious thought is deemed to be slow because it needs to be processed and that it requires a certain amount of time. However, the subconscious thought occurs in the right hemisphere.

As species, people, as much as they would like to believe and think that they’re very advanced, the fact remains that they need to take a lengthy way before they can reach their full potentials. When it comes to brain power, experts estimate that a mere 10% of it is possessed by the human brain. So far, this is the percentage of brain power the human brain possesses.

That requires another set of discussion. Suffice to say, the subconscious thought is still being studied. According to earlier studies, in some people, the subconscious thought starts by approaching the Light speed. The theories about this matter simply suggest that intuition and premonition were inescapable. For majority of people, the left side and the right side of the brain don’t communicate with one another effectively and that some individuals, who are less gifted, need a way to make their left brain silent and in order for the right brain to function.

It is now possible for the medical science to chart down the brain waves and eventually gauge and document the brain areas that respond to the external information. In fact, it can already be done on real time. In the future, same with the human genome documentation, intuition’s mechanics can be understood and unlocked.

**How can this really help the lottery enthusiasts?**

If it is possible to discern the future through the speed of Light, and if the subconscious thoughts can approach that speed, this implies that the subconscious thoughts may acquire an occasional peek of future events. This is referred to as Premonition. If this theory works, then how can lottery enthusiasts make it work for them?

As the people’s subconscious thoughts and their premonitions, as well as their surroundings change, the brain waves too also change. The change in the brain waves happens with the changes in the chemistry of the body which is in the form of endorphins and hormones. These hormones are what control the temperature of the body, the rate of respiration, the body moisture, and other bodily phenomenon.

These changes are referred to as “Autonomic Responses,” and as a matter of fact, they’re measurable. For those who are eager to know if this is true, they can talk to those who are experts in polygraph lie detector. Nowadays, it is possible for people to gauge the Autonomic Responses, as well as synchronize them with the personal intuition, in real time.
One kind of device that can be used in selecting Lottery Numbers is Bio-Pick. This particular device has a feature called a sequencer, which replies to the valleys and peaks of the person’s subconscious energy. Other than this feature, though it lacks explanation, the Bio-Pick’s number sequencer locks onto as well as follows the person’s intuitive energy.

When the person triggers the “Select” option on the Bio-Pick device, and selects a number, the result will show a number that is closely akin to what his intuitive right brain is saying at that very moment. Many truly believe that the subconscious thoughts know a lot, which is why they rely on its power.

In order to better understand the mysterious nature of the human mind, the Bio-Pick device was developed as an interesting and unique experimentation of the subconscious thoughts. As the human mind becomes more knowledgeable, the people are also able to apply this knowledge properly.

From its humble beginnings, there are a lot of positive reports about the Bio-Pick. Needless to say, more and more lottery enthusiasts believe in the helpfulness of the Bio-Pick.

Questions and Answers about the Mind Power

Question: Can self-love exercises help people find the perfect partner for them?

Answer: Working with self-love, as well as with self-acceptance is a process that needs to be done every day. As a matter of fact, it can render positive changes to a person in the form of small increments. One great strategy that can be used is “Acknowledging.” People who are looking for the love of their life can create a list of the things that make them feel wonderful about themselves.

They can as well create an “Acknowledging list” that talk about the features that make them a great lifetime partner. They should also create a list of things which they think can bring to the table. Through this way, people can have a vibration which is self-accepting. One of the worst things in this world is needy vibration that comes from a person and anyone can sense that.

This particular vibration can ruin a person and it can repel possible suitors. If people can vibrate with high self-esteem and success, then he can attract more people.

Question: Is it possible for people to win the lottery by using the Mind Powers? Are there people who used Mind Power related concepts and won the lottery?

Answer: It is definitely possible to utilize the Mind Power in order to win the lottery. However, it’s not a good idea to use the Mind Power because the odds against achieving
the jackpot are high, and there are numerous people who are putting thoughts and energy in winning the game. The best option for people is to simply work on the abundance that comes to them and just let the Universe decide which way is best for them.

There are a lot of lottery enthusiasts who fortunately won; however, it is not clear whether this is with the help of Mind Power or just a coincidence. What is clear and sure is that working for the sake of abundance, as well as on the vibrations of the abundance, can serve a person in the long run, instead of just paying attention on the lottery.

**Question:** Will it take long for a person before he can change his unpleasant habits through the Mind Power methodologies, like visualization and affirmation?

**Answer:** Habits are developed by repetitively reinforcing a thought or an action. In order to develop new habits, initially, people need to ascertain the habit or the habits that they want to change, and then start a Mind Power scheme to re-create in their minds the new habit they’re yearning to have.

As a matter of fact, there are cases whereby the new habits are attained just within a matter of 1 to 2 weeks; however, in majority of cases, it takes a long span of time for a new habit to imprint into the person’s subconscious. People are different from one another; however, one thing is for sure, if they allot pertinent amount of time to their efforts, they’ll surely reap amazing results.

**Question:** What if practicing affirmations doesn’t render positive results, what should be done?

**Answer:** People must make sure that they are not affirming summons and that they’re indeed affirming positive events. Primarily, as people change their consciousness and their thoughts, their reality also changes to match these aspects. However, it is possible, particularly during the initial stages, that there are no positive events. In fact, there are cases whereby the condition becomes worse during the beginning stages.

Reality is considered as the delayed reflection of the beliefs and thoughts. Long years of having negative thoughts can’t be changed easily within 1 to 2 days, or even in 1 week or in a month. Just continue practicing affirmations. Through this way, positive things will come along the way. A simple tip: People can slow down a bit or put their funds in the parking meter.

**Question:** Can Mind Power techniques be dangerous?

**Answer:** Not knowing how to properly use the Mind Power techniques can be dangerous, especially if they’ll be used in a wrong manner. However, if a person is able
to ascertain the powers of his mind and is able to know how to use these powers, these can be used as helpful tools in life. Probably, the worst problem is manifesting something that the person thinks he wants, but it is not what he really needs.

People should initially check their subconscious before trying to manifest a major goal. They have to ensure that they receive strong signals that what they want to manifest is a worthy goal. They should plug into their inner wisdom. People are not bound to walk on all paths. There are some paths that are worthy to take, while some are not.

**Winning the Lottery through Positive Affirmations**

Below are some positive affirmations that lottery enthusiasts can use to motivate themselves. The following affirmations may align people’s subconscious and conscious minds. This can as well unlock their intuitive capacity to anticipate the winning lottery numbers or combinations.

Lottery enthusiasts should imagine the feeling that winning the lottery can provide. They should imagine how does it feel to be financially stable, to be free from stress, knowing that they can better take care of themselves and their families. It is relevant for lottery enthusiasts to imagine these aspects.

This can help them in programming deep beliefs in their subconscious minds. It can ensure them that they have the right mindset for enticing massive luck. It is advisable to use the following affirmations at least 2xs a day- people will create an instinctive knack for selecting winning lottery numbers, the minds of the lottery enthusiasts will be aligned with the aim of winning the game, and they will deeply believe in their capacity to achieve a lottery win.

**Present Tense Affirmations**

Lottery enthusiasts should:

- Deeply believe that they can win the lottery
- Believe that their mind is connected with the force of the Universal luck
- Think that they’re destined to win staggering amounts of funds
- Think that they always select the right, winning numbers
- Think that they are extremely lucky
• Believe that they are born to be a lottery winner
• Visualize themselves winning the lottery
• Believe that they can entice money and luck naturally
• Be focused on selecting the right lottery numbers
• Believe that they are luring a huge lottery win

**Future Tense Affirmations**

Lottery enthusiasts must believe/think:

• That they will win the lottery
• That they will attain the kind of life they’ve always wanted
• That they can sense the winning numbers easily
• That every day, they lure more luck into their lives
• That they will become more focused on attaining success in the field of lottery
• That they will deeply feel that they are bound to win the lottery
• That they will be more accustomed to the reality of Lottery winning
• That their belief in winning the lottery will become stronger
• That they will be able to utilize positive belief and thinking in order for them to select the right numbers
• That they will be able to utilize their intuition to select the right lottery numbers.

**Natural Affirmations**

Lottery enthusiasts must think that:
• It is their destiny to win the lottery jackpot

• They deserve to win a huge amount of money

• They can win the lottery naturally

• Selecting the right lottery numbers comes naturally

• Their minds are effortlessly focused, in-tune, and clear

• Other people see them as someone who is naturally lucky all the time

• They have in-depth connection with luck’s universal force

• They are the kind of individual who always win in the lottery

• They can easily visualize themselves winning the a lot of money

• They can take care of their families and even their friends using their lottery winnings

Other incredible affirmations are: attract money, attract luck, enhance visualization, think and grow rich, and millionaire mindset.
Chapter 6
Following 1 Reliable Lottery System Or Software At A Time That Will Aid You

Increasing the Chances of Winning the Lottery

When it comes to lottery, one thing is for sure; in order to win, people must play. Lottery enthusiasts should think about how much they are willing to allot for the lottery game, without hesitation. The rule of thumb in gambling is that players should only use the amount of funds that they can afford to spare even though they are not sure that they will win.

One can increase his chances of winning the lottery by purchasing more lottery tickets. People may opt to split the investment by simply playing with their closest friends or relatives and by joining the so-called lottery syndicate. However, lottery enthusiasts must remember that if they do the latter tip, the more individuals using similar set of numbers, the lesser the amount of funds every person can acquire even though the group is able to reach the jackpot.

Splitting the jackpot with a dozen individuals may give lottery enthusiasts a far better payout than splitting it with 100 or a thousand people. Lottery enthusiasts can also increase their chances of winning by using a set of numbers that is not used by anybody else. Playing the set of numbers that is also being used by numerous people is not really a sound idea.
Why? For instance, a lottery player hit the jackpot; however, he used a set of numbers that is also played by a thousand people. This simply means that he has to share the prize with a thousand people. This means that there’s a possibility that he’ll receive a small percentage.

Prepare your Mind to Win the Lottery

Everyone wants to win the lottery. Well, who wouldn’t? This would mean buying a home, car, invest in stocks, and other expensive items that you’ve always wanted to have. Winning the lottery is extremely important in these difficult times. If you are experiencing different types of financial problems, then you’d probably think that the easiest or most convenient thing to do is to win the lottery.

Is Winning the Lottery Possible?

For those who have previously won the lottery, they’d say it is definitely possible. It’s possible if you learn how to train your mind and leave clear instructions to evaluate everything. Many individuals want to improve their income so as to purchase more products and enjoy a state of wealth or prosperity.

What’s the Secret to Winning?

The basis of everything is your own state of mind. For instance, if you want to learn how to play golf, chess or billiards, it’s important that you condition your mind into it. How can you possibly succeed if you’re still thinking that it’s impossible for you to learn? Positive thinking is always connected with success and prosperity.

Others are often attributing winning the lottery to luck. However, the truth is that you have a mental plane. Of course, there are certain words such as “bad luck” or “good luck”, but it’s just an information system that your mind has created and you were simply “programmed” to believe in it.

The Art of Visualization so as to Win the Lottery

A lot of individuals are still asking if it’s possible to utilize visualization so as to win the lottery. Using visualization to win is quite different from making use of the same technique to gain other things. For instance, if you wish to have a car, there are a lot of vehicles in the world. In fact, many more are constantly being manufactured. Hence, you can take a loan to purchase your preferred vehicle, work and earn then use the money to pay for a car.

It’s the same for those who want to own a home, have a new television set, purchase a new pair of shoes or shop for a laptop. Likewise, it’s the same for those who wish to establish their own successful company.
With lottery, it’s different. There’s just one single prize. This is where all individuals focus their attention; therefore the chances of winning are smaller. However, you have a greater chance of winning smaller prizes, since there are more of those prices compared to the first prize.

There’s just one price for the winner, and millions are unconsciously or consciously visualizing this prize. They’re also expecting to win the same. As such, it’s going to be your thoughts against theirs. There’s always a higher likelihood of achieving or gaining anything, whenever there are a lot of chances or opportunities, than when there’s just a single chance. This is the reason why it would be more reasonable for you to expect victory if you simply visualize it.

The question is this: do you want cash? Do you want hit the lottery draw? Does it matter which channel you’ll use to get the amount? Is it imperative that the cash come from the lottery?

There are individuals who don’t want to work hard and sweat a lot. They don’t even want to get involved in any type of business. Needless to say, they want the easiest way to win the lottery or to gain enough money to purchase the things that they want. They believe that the lottery is the only way for them to win big money.

The truth is that visualization can help people in winning the lottery, but there’s no guarantee that this will become real. You have to consider a few things:

1. How clear is the image of winning in your mind?
2. How strong is your power of concentration?
3. Do you devote time to this type of visualization, and how much time can you afford to allocate?
4. How much faith do you have to put into the visualization?
5. How many individuals are also visualizing winning the lottery?
6. Do you have certain doubts that might be bothering your thoughts?
7. Are you familiar with several mental laws of visualization and success? Are you using them?

These are just some of the most important factors that would eventually determine whether or not you’ll win the lottery.

You may want to win because you want cash. If you want cash, why do you prefer to gain it by means of the lottery? Why do you have limit yourself to only one channel? Why not
try visualizing the money, and at the same time be open to lots of unlimited channels. These channels can help make the money appear.

When you try to visualize winning the lottery, how’d you feel right after checking the outcome and learning that you did not win the pot money? Do you feel unhappy, frustrated, and lose your faith in the power of mind control? If you do, you’re ruining your visualization.

You’ll have to visualize yourself feeling prosperous and happy in order for you to feel so. Always remember that one’s feelings have greater power or impact on the subconscious mind. If you are feeling happy and prosperous within, your external life will gradually be prosperous and happy, too.
Chapter 7
Believing You Will Win. Visualization Is Everything

Secrets of the Law of Attraction and Its Impact on Winning the Lottery

Every person on this earth is born with a particular destiny and alignment with the universe (both material and astral). Consider this line of thinking: the cosmos knows best when it comes to what’s best for every person, and things manifest or happen or don’t happen at the right time.

It’s best that you explore the connection between the Law of Attraction and the Lottery. Can this particular law help in attracting success in order for you to finally win the draw? The answer is a resounding “yes”. It definitely can!

It works without bias in terms of manifesting anything. You can provide a strong feeling to almost anything. Did the lottery winners use this secret to win the lottery? Cynthia Stafford did. Cynthia won the state lottery in California in 2007 and took home a whopping $112 Million.
Cynthia always had a strong belief in Law of Attraction, and eventually decided to make use of the principles for a period of 4 months. She continuously practiced visualizing the type of lifestyle which she could enjoy whenever she’d win that amount of money.

How did Cynthia do it? Well, she focused her attention on the figure, wrote the amount on paper, and kept the same under her pillow. Cynthia continued this type of obsessive focus for more or less 4 months prior to releasing that focus and consequently won the lottery's first division which is worth $112 million.

There is a difference between simply wanting the money and winning the Lottery. What do you really want? You have to admit the truth that anyone will be overjoyed after becoming a multi-millionaire overnight! Consider this: wouldn’t it be totally nice for you to check your account each morning, and to see a huge amount of cash therein? This amount would even earn so much interest, and you could basically live off it.

Don’t you think it would be totally awesome for you to afford anything without even lifting a finger? Well, after all is said and done, winning the lottery is an excellent way for you to address some important things you would always want to do in your life.

The lottery is definitely a good way for you to earn some cash – but it’s best that you do not limit yourself to a single channel. This would mean that you are giving a sign to the universe that your money-making opportunities should be limited. Always bear in mind – the Law of Attraction would respond to what you are focusing on.

How would you feel when you actually win the lottery draw? Surely, you love winning a huge amount of cash, and winning the lottery will potentially modify your life forever. But, prior to starting your visualization activities on how your state of living will turn out to be, you have to address certain limiting beliefs about money, more so when it comes to winning larger sums.

For instance, when you buy a ticket for the lottery, do you immediately feel that you are not going to win? Is there a nagging feeling that your chance of winning is too low? Do you immediately feel that you do not deserve to win simply because there are other people in this earth who definitely deserve to win more than you? Are you having the feeling that only old individuals and the genuine destitute have a higher chance of winning?

If you feel these aforementioned sentiments each time you play the lottery, then you are simply affirming these types of beliefs. Believe it or not, they’ll manifest, and you will be at the losing end. The moment you imagine yourself hitting the jackpot, you have set the process which is called “creation in motion.” However, if you really want this type of creation to effectively manifest, then you need to get rid of all those limiting beliefs.
You have to believe that the amount is already yours. You deserve to win this amount no matter how big it is. You deserve to win the jackpot just like anybody else. Bear in mind that the Universe is the ultimate decision maker and it surely knows best. You have to leave any type of judgment behind. If you have to succeed, you certainly will.

The next point to consider is: how will you feel in case you don’t win the lottery? So, you have set the creative process in motion, and you’ve now accomplished a bit so as to get rid of all those limiting beliefs. But, how would you feel about winning small amounts or not winning at all?

If you’ll only feel disappointed or angry whenever you don’t win, it’s a must that you immediately flip those emotions. When you affirm those feelings, you are, in fact, affirming lack of love. This is contrary to the prime power in which everything in this world has come into existence. There’s always a next time in case you don’t win. You will always have another opportunity.

If someone else wins the prize, you should feel happy for them. You have to bear in mind that individuals are akin to balls of energy, and are all connected with one another. By feeling happy for other people’s fortune, you are in effect making such fortune stick to yours. Indeed, love possesses a sticking power, and this will increase your own magnetic capacity to attract the fortune.

Stay away from negative feelings such as those of being judgmental. The cosmos is alive, and it can be like everything and anything else. It knows what is best for everyone. So, you have to celebrate any victory, whether big or small. It doesn’t matter whether the success is your or somebody else’s; you should always be filled with an enormous and heartfelt smile.

Why do you want to win the lottery? Do you want to get out of debt?

If one of the foremost things that you are visualizing is getting out of debt, then there’s a good chance that you will remain in debt. The Law of Attraction implies that thoughts can become a reality, and this law does not distinguish between remaining in debt and getting out of it. If you are thinking about “debt”, you are going to remain in it.

Remember this: even though you are indebted, try not to focus on this negative thing. Set up an auto debt-repayment program, then continue focusing on your assets. Remain focused on what you really want, and don’t mind the things that you don’t want. In addition, focus your attention on the things that you have. Be grateful for these things.

You may focus on money; however, don’t get too obsessive when it comes to a single channel since it will only limit your capacity to bring in a huge amount of cash.
Remember, wealth and money are energies, and it’s your feeling towards these things that would ultimately determine whether or not they’ll enter your life.

Avoid spending excessively on lottery tickets!

Do yourself a favor. Stop spending your entire week’s salary on lottery tickets! Take note that if you really have to win the lottery, you have to consider your destiny or alignment with the universe. Hence, nothing will ever come your way.

Many studies prove that while things such as odds and statistics have their scientific merit, people should also look into the real deal. Remember the odds: is it 50-50? Or 1 in a million? You will either win or lose. It is really that simple.

Lotteries are like any other type of business investment. You either strike it rich or bust out! But, you should never spend the amount that you have siphoned away for more important things such as your mortgage, food, rent, or bills on tickets alone. Be positive and happy; however, you have to bear in mind to play it safe.

Additionally, you should not be too attached to the results. Things would manifest depending on the divine intelligence, and this could happen in the right time. It’s usually the most difficult thing to handle, but you have to let go of any control that you have over the results. Try not to think too much about it. You are free to wish or desire to win, but it’s definitely wrong to be desperate since this would focus on lack of things and not the acknowledgment of prosperity.

**Tuning up your Cash Vibration**

You have heard stories regarding people winning it big only to go broke after a few years due to sheer mismanagement of the new found fortune. It’s all due to the individual’s “money-vibration.” This is the type of money or amount that their subconscious mind is comfortable with.

The story of Donald Trump is one very good example. Donald won the lottery, not once, but several times until such time that the amount he got went into millions. Despite everything, Donald lost the amount that he’s won. This is due to the fact that Donald Trump’s psychological or subconscious vibration of cash was at a particular level which was specially tailored to rise above limiting beliefs regarding temporary losses. Needless to say, the amount of money that his mind can handle isn’t millions. So, there’s no other way out, but to go back to a few dollars in his pocket.

Winning a larger sum of cash is all fair, but if this is your objective, make sure you are more than simply 'ready' to tune-up your subconscious mind or psychological being into
being in agreement or accord with that sum of money. This way, you do not have to come up with so many reckless choices in disposing the amount that you’ve won.

Win In the Lottery by Making Use of the Law of Attraction

Is it true that the law of attraction as well as the mind of the millionaire have something or anything to do when it comes to winning the million dollar lottery? Everything! If you really want to win the lottery, it’s recommended that you make use of the Law of Attraction.

Did you ever think of applying this law so as to win the lottery? Not everyone did, but if you are going to ask those who have won the lottery, they’ll tell you honestly how this particular principle was able to help them out. In these modern times, it’s important for people to stay positive.

Gone are the days when you could simply stay pessimistic all the days of your life. This is definitely not the right way to handle things. No matter how big your problem is or no matter how terrible the circumstances turned out to be, it’s a must that you do everything to keep your mind busy with positive thoughts. Remember that the things that you are constantly thinking will always come true.

What does this mean? It only means that if your mind is always filled with negativity, then you will forever be stuck with negativity. Surely, you don’t want this to happen. You want everything to be smooth-sailing. You want to win the lottery, purchase a new home, change your old car, get an education perhaps, send your children to the best schools in the country, tour around the world, invest in several types of properties and other things that you could only dream of.

But, wouldn’t it be so nice if you could simply use this Law of Attraction so you will win the million dollar lottery? It’s possible especially if you will take time to comprehend how this Law of Attraction would work as well as how to eliminate all those conflicting beliefs and limiting values that will eventually cause you to lose.

In simple words, the law of attraction states that people will eventually get what they believe in. It’s like “done unto you in the same way you believed in” or “done unto you in accordance to your faith”. One’s deeply held beliefs will materialize into reality. Now, since many individuals are familiar with this concept, and have proven the same to be effective, you have to study the same. Learn all the ins and outs of the Law of Attraction.

If you want to play the lottery, always remember that the following should be done:

1. Learn. There are several techniques that you should use such as to identify and get rid of all those conflicting and limiting values, beliefs and rules.
2. Eliminate and identify as many limiting and conflicting rules, values and beliefs.
3. You have to learn the right strategies to imprint or program into the subconscious mind any type of new empowering rules, values and beliefs which will permit you to win the game.

4. You must always inculcate in your mind that you are going to win, and never doubt this even for a second. You shall win – believe this with all your heart.

Of course, you should always fill your mind with some of the most useful, positive as well as supporting beliefs such as the following:

1. You are a lucky human being. Needless to say, the universe is very kind to you, and you’ve always achieved what you wanted in life. Your family loves you, and you love them too.

2. There’s no problem or issue that you cannot possibly handle. You’ve been various ups and downs in life, and you have always emerged as the winner. There’s nothing that you should fear because you know in your heart that you can handle everything.

3. This is real cash, and the only thing that you are going to do is to take the money. How convenient could that be? It’s really easy to make money, and you don’t even have to work hard to get it. This is it, take it!

4. Make use of your mind or brain power to attract positive thoughts or vibes.

5. The cash that you’ll get the easy or most convenient way is important to turn your life around.

6. It’s easy for you to win the lottery. Other individuals have previously done this, and they became really successful in this type of endeavor. Never mind about any stumbling block that will come your way. Don’t focus on these things. You are here to win so you should not let anything stand in your way. You should be aware of these obstacles in order for you to do everything to resolve the issue.

7. Winning the million dollar lottery is simply a matter of belief.

8. You have complete faith and dedication in winning the lottery.

In a nutshell, one’s major challenge is simply to identify as well as to get rid of all the conflicting rules, values and beliefs.

To get you started, you have to repeat these words to yourself. Do this all throughout the day:

"I’m a true winner."

“I’m very lucky.”

“It’s really fun and easy to win the lottery.”

“I will win the jackpot.”
Repeat these words over and over. Do this while you are walking, taking a shower, driving, watching television, or eating your lunch. Let this become a significant part of your daily routine. This way, it will be stuck in your subconscious mind.

After you have thoroughly conditioned your mind into winning, you have to choose a small amount of cash to start with. Set a specific deadline for you to win this particular sum. If you happen to lose by that date, this would simply mean that you weren’t able to become totally successful in getting rid of your fears and doubts. These negative things are still connected with your subconscious mind.

Make sure to keep doing the routine. Sooner or later, the subconscious mind will eventually get the message and begin working for you and not against you. Once you get to that particular place in your mind – the state where you fervently believe that you are going to hit the jackpot, then you must win.

**Increasing your Chances of Winning the Lottery**

If you want to win the big jackpot, one thing’s for sure: you have to play. But, decide how much cash you could afford to invest in terms of playing the lottery. Do this, and make sure that you don’t lose your sleep over it. The primary rule in placing a bet or buying a lottery ticket is to play only with a specific sum that you can afford to part with. This means, that you can afford to lose the sum if you aren’t one hundred percent sure that you are going to win the game.

You can boost your chances of winning the draw simply by purchasing more tickets. In addition, you can also increase your winning chances by playing with numbers that nobody else is likely to select. If you play a lottery system which thousands of other individuals or players are getting into, even if you actually hit the jackpot, there’s a chance that you’ll end up sharing the pot money with other people.

Increase your chances, and win the lottery by selecting to play this game with a much better odd of winning. You have to check the odds that you’re going to win versus the risks. Also, make sure that you check out the payout, and consider the amount that you need in order to help improve or change the quality of life that you have right now.

Do you want to go for the $350 million lottery, if it is 100 times more difficult to win the same compared to a $35 million pot money or $35 million or $3.5 million, but the odds are 1,000 times easier for a starter? One can actually increase the chances of winning the draw by playing less as well as playing more lines within a single draw.

For instance, if you usually play 20 lines weekly, you can start playing 40 lines for every two weeks until such time that you can afford playing 80 lines for every four weeks. You have to face the truth that the price of the lottery tickets can be quite burdensome. Be realistic. After conditioning your mind that you will win the game, at the end of the day,
you have to realize that you don’t have to invest in thousands of lottery tickets so as to win.

Everyone has their own destiny, and if you are destined to win the game, then nobody could stop it. The most important thing is for you to do everything to ensure that your mind is focused on your goal. Do you know that you can win the lottery even with a single ticket in your hand? This is entirely possible and there’s no doubt about it. Ask thousands of people who are previously won the lottery. They will tell you exactly that!
Brain Power and Quantum Mechanics: Can these Aspects Help People in the Field of Lottery?

As highly cognizable, lottery is a form of a random draw and it is indeed difficult to calculate the end result. Due to the fact that one should make a bet first prior to the draw, it’s difficult to anticipate the winning numbers. After all, the end result of the lottery is a future event and people don’t have the capacity to foresee the future.

However, if experts like particle physicists, cosmologists, and other individuals who are studying the Quantum Mechanics, will be asked, they would certainly say that there is no such thing as impossible.

Consider what the Experts Say

Based on the explanations of experts and certified geniuses Dr. Stephen Hawking, Albert Einstein, and Max Planck, “Time and Light are indeed correlated to one another.” According to these great men, as the Light is being forced to go on a slower pace (when entering the Black Hole), the Time tends to slow down. Black Holes are believed to be dense, preventing the Light from escaping. Thus, once in a Black Hole, the Time indeed ceases.

Contrariwise, the Light goes on a fast pace as does the Time. Therefore, if a person does the Light Particle Travelling via vacuity of space, from his own perspective, there would
be no time, but in different way. Experts also say that at the speed of Light, the Time also becomes quick whereby it seems everything happens continuously—the past, the present, the future, everything happens simply and simultaneously. Maybe for some this aspect is quite mind-boggling. The best thing to do is take the experts’ opinion.

**How can this help people win the Lottery?**

If people embrace the concept that at the speed of Light, each and every Time, and that includes the future events can be easily ascertained. If only people have the mechanism to travel along with the speed of Light, they can have a sneak peek or even just a hint of what will happen in the future.

**Understanding the Light**

Primarily, the Light is considered as energy and that the subconscious thoughts are the same with Light. The human brain has 2 phases, which are referred to as Hemispheres. Based on the experts’ explanation, the left phase of the human brain deals with logical tasks, whereas the right side or the right hemisphere has something to do with creativity and intuitive tasks.

However, for most humans, it is quite impossible, while they’re awake, for the left half or the conscious side to determine or comprehend the esoteric thoughts that are in the right half. Until the left side becomes silent and take off its grip of the thoughts, for instance, when sleeping, people certainly have a hard time accessing the powerful intuition and creativity of the brain’s right side.

There are times where people become faintly aware of a hunch, a feeling or have some sort of premonition of what will happen in the future, which they think might occur. This means that the right side of the brain functions and it is called Intuition.
